

Tutoring Report 3

Date of session(s): October 27th, 2023

Names of tutor(s): Kenzie Kelly

Name(s) of Learners: Esperanza, Eliana

How long was the session? 2 hours, 4 minutes

For the next section you do not need to write a lot. Feel free to use bullet points to make your points.

1. List 2-5 things you did in the session in the order that you did them.

- Practiced math problems and reviewed test topics
- Worked on complex sentences with the class in her Reading Course
- Worked with Esperanza and Eliana in a pull out context in Social Studies
 - Critical reading and writing workshop

2. Do you have concerns you would like us to discuss in class (I won't mention your name).

- In working with Eliana and Esperanza on their social studies work, I checked in with their teacher and he said that while most of the class finished up with a paper already Eliana and Esperanza had barely begun the first exercise and could finish the paper by the end of next Friday. It is difficult to think about helping students catch up with this substantial amount of work when I only have such a limited time to work with them.

3. What did your student do well this week?

- Esperanza had a great day on Friday, participating actively in games in her reading class and helping Eliana with the class assignments for social studies. It has been really amazing to see her become such a great friend to Eliana. Eliana's first day at school was my first day working with Esperanza at Beman and watching as they have become fast friends and have supported each other has been really amazing. Esperanza is a huge help with translating information to Eliana as Eliana can not communicate yet effectively in english. Also, having Esperanza explain material to her friend has been great for her to develop her own understanding.

4. What do you believe your learner needs to improve? What can you work on next class and in future classes?

- I would love to continue to work with Esperanza and Eliana on reading comprehension, especially within the social studies class. I think that is where I have seen the most difficulty but also the most substantial improvement.

5. Evaluate yourself. How did the lesson go? What could you improve upon in future lessons? What should you repeat because it went well?

- This week Esperanza seemed to come out of her shell much more with me and we checked in about Halloween plans and costume ideas. We had a bit of time to work together outside of her classwork. I asked what she wanted to work on and she wanted to review her math work because she struggled with the last test. Next session I would love to check in with her math teacher because it was really difficult to practice with Esperanza with no actual worksheet or test to look at. I tried to create problems for her to do based on her explanation of the math test but something more concrete would be very helpful.
